

Ambulatory Blood Pressure Monitoring (ABPM) System

BPAro is a clinically validated 24 hour (up to 7 days) Automatic Ambulatory Blood Pressure Monitoring (ABPM) device approved by both FDA and Health Canada. It automatically measures and collects blood pressure readings, reducing the workload for physicians and patients. The data generated creates a blood pressure profile for the patient based on their individual routine, unaffected by any biases created by clinical settings.

Distinguishing Features

Dedicated Setting for Diabetes 

FDA and Health Canada Approved
